No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (Operations Staff, P. O. Box 765, Schenectady, New York 12301), for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1978 articles are the same as those shown for current articles.

CONTENTS OF VOLUME 87

NUMBER 1, JUNE 15, 1978

L. J. WALLACE AND L. M. PARTLOW. A Sensitive Microassay for Protein in Cells Cultured on Collagen.....	1
FREDERIC E. DORER, KENNETH E. LENTZ, JOSEPH R. KAHN, MELVIN LEVINE, AND LEONARD T. SKEGGS. Purification of Human Renin Substrate	11
J. E. BLEASDALE, C. S. DAVIS, A. K. HAJRA, AND B. W. AGRANOFF. A Rapid Sensitive Assay for Phosphatidate Phosphohydrolase	19
AMNON GONENNE AND ROBERT ERNST. Solubilization of Membrane Proteins by Sulfobetaines, Novel Zwitterionic Surfactants.....	28
SCOTT C. RICE AND NING G. PON. Direct Spectrophotometric Observation of Ribulose-1,5-bisphosphate Carboxylase Activity	39
HITOSHI AOSHIMA. Analysis of Unsaturated Fatty Acids, and Their Hydroperoxy and Hydroxy Derivatives by High-Performance Liquid Chromatography	49
NEIL D. LEWINSKI AND EUGENE E. DEKKER. Detection of Aldolase Activity on Polyacrylamide Gels: Application to 2-Keto-4-hydroxyglutarate Aldolase	56
ANNE DEVILLERS-THIERY AND GÜNTER BLOBEL. Separation of Phenylthiohydantoin-Amino Acids by High-Pressure Liquid Chromatography for Sequence Determination of Radiolabeled Proteins	66
S. BAUR, V. C. BACON, AND G. L. ROSENQUIST. Preparation and Use of ¹²⁵ I-Labeled Synthetic Human (15-Leu)Gastrin 1-17-I for Radioimmunoassay of Conventional Human Gastrins	71
T. H. FINLAY, V. TROLL, M. LEVY, A. J. JOHNSON, AND L. T. HODGINS. New Methods for the Preparation of Biospecific Adsorbents and Immobilized Enzymes Utilizing-Trichloro-s-triazine	77
WRIGHT W. NICHOLS AND W. ALLAN HAMILTON. The Preparation of Tightly Coupled Membrane Vesicles from <i>Paracoccus denitrificans</i>	91
OWEN M. GRIFFITH. Separation of T and B Cells from Human Peripheral Blood by Centrifugal Elutriation.....	97
RICHARD F. PARRISH AND KENNETH L. POLAKOSKI. An Apparent High Molecular Weight Form of Boar Proacrosin Resulting from the Presence of a Protein that Binds to Proacrosin	108
JUDITH A. SWACK, GARY L. ZANDER, AND MERTON F. UTTER. Use of Avidin-Sepharose to Isolate and Identify Biotin Polypeptides from Crude Extracts	114
D. DOLMAN AND S. J. GILL. Membrane-Covered Thin-Layer Optical Cell for Gas-Reaction Studies of Hemoglobin	127
HOWARD B. MICHAELS AND JOHN W. HUNT. Determination of Peroxides and Hydroperoxides in Irradiated Solutions of Nucleic Acid Constituents and DNA	135
M. G. GORE, P. M. JORDAN, AND A. G. CHAUDHRY. Automated Assay for δ -Aminolevulinic Acid Dehydratase	141
S. A. QUARRIE. A Rapid and Sensitive Assay for Absciscic Acid Using Ethyl Abscisate as an Internal Standard	148
A. A. GINEITIS, B. ANACHKOVA, AND G. RUSSEV. Failure of Preparative Flat Bed Electrofocusing to Resolve Rat Liver Chromosomal Proteins	157
KENNETH MOPPER. Improved Chromatographic Separations on Anion Exchange Resins. III. Sugars in Borate Medium	162
JACQUES MACLOUF, HERVÉ SORS, PHILIPPE PRADELLES, AND FERNAND DRAY. Improved Sensitivity of Iodinated Histamine-Prostaglandin Radioimmunoassay by Prostaglandin Methyl Esters	169

PAUL E. DRIEDGER AND PETER M. BLUMBERG. Design and Construction of a Simple and Inexpensive Slab Gel Electrophoresis Apparatus	177
PETER GLATZ. Limited Rotational Diffusion of DPH in Human Erythrocyte Membranes	187
JOHN ROBOZ, ROBERT SUZUKI, AND J. GEORGE BEKESI. Determination of Neuraminidase-Susceptible and Total <i>N</i> -Acetylneuraminic Acid in Cells by Selected Ion Monitoring	195
MARY ANN K. MARKWELL, SUZANNE M. HAAS, L. L. BIEBER, AND N. E. TOLBERT. A Modification of the Lowry Procedure to Simplify Protein Determination in Membrane and Lipoprotein Samples	206
WILLIAM E. BROWN AND KENNETH B. SEAMON. Quantitation and Characterization of the Trifluoroacetyl Derivative of Cysteine: A Useful NMR Probe	211
DONALD M. KIRSCHENBAUM. Molar Absorptivity and $A_{1\text{cm}}^{1\%}$ Values for Proteins at Selected Wavelengths of the Ultraviolet and Visible Regions. XV.	223

SHORT COMMUNICATIONS

N. CATSIMPOOLAS, A. L. GRIFFITH, E. M. SKRABUT, AND C. R. VALERI. An Alternate Method for the Preparative Velocity Sedimentation of Cells at Unit Gravity	243
J. MATKÓ, L. TRÓN, AND S. DAMJANOVICH. A Method for Continuous Monitoring of Phosphorylase <i>b</i> Activity during Glycogen Degradation and Synthesis	249
J. L. FOX, S. E. STEVENS, JR., C. P. TAYLOR, JR., AND L. L. POULSEN. SDS Removal from Protein by Polystyrene Beads	253
HIDEO NAKAGAWA, KATSURO SHUTO, AND SUSUMU TSURUFUJI. An Improved Method for Determining the Activity of Benzoyl-Arginine <i>p</i> -Nitroanilide-Hydrolyzing Enzyme in Crude Tissue Extracts	257
NICHOLAS D. LIGHT AND MICHAEL J. A. TANNER. An Affinity Chromatography Method for the Preparation of Human Reticulocytes	263
M. S. F. ROSS, D. S. LINES, K. R. BRAIN, AND R. G. STEVENS. Monooxygenase and Epoxide Hydratase Analysis by High-Performance Liquid Chromatography	267
CARL MOOS AND I-NAN M. FENG. Pyrophosphate Contamination in Crystalline Phosphocreatine: A Source of Error in Kinetic Studies using Coupled Enzymes	272
R. F. VENN, J. M. BASFORD, AND C. G. CURTIS. [G - ^3H]Dansyl Chloride in the Analysis of γ -Glutamyl- ϵ -lysine: A Cautionary Note	278
KENJI SODA, TOSHIKO HIRASAWA, AND TAKASHI FUKUMURA. Spectrophotometric Determination of L-Lysine with L-Lysine: α -Ketoglutarate ϵ -Aminotransferase	283
R. J. BLAGROVE AND M. J. FRENKEL. Two-Dimensional Electrophoresis: An Application Combining Cellulose Acetate Membrane with SDS-Polyacrylamide Gradient Gel	287
ROBERT ROSKOSKI, JR., AND LAURA M. ROSKOSKI. A Rapid Histidine Decarboxylase Assay	293
ERRATUM	298

NUMBER 2, JULY 1, 1978

JOHN A. SMITH, J. G. R. HURRELL, AND S. J. LEACH. Elimination of Nonspecific Adsorption of Serum Proteins by Sepharose-Bound Antigens	299
SAMPISA HAARASILTA. Enzymatic Determination of Biotin	306

WLODZIMIERZ ZAGORSKI. Preparation and Characteristics of a Wheat Embryo Cell-Free Extract Active in the Synthesis of High Molecular Weight Viral Polypeptides	316
SILVIA BIOCCA, PIETRO CALISSANO, DONATELLA BARRA, AND PAOLO M. FASELLA. Preparation of Highly ³ H-Labeled S-100 Protein under Nondenaturing Conditions	334
HSIN-HSIUNG TAI AND BARBARA YUAN. Development of Radioimmunoassay for Thromboxane B ₂	343
HSIN-HSIUNG TAI AND WILLIAM Y. CHEY. Development of Radioimmunoassay for Motilin	350
FRANS STELLAARD, DAVID L. HACHEY, AND PETER D. KLEIN. Separation of Bile Acids as Their Phenacyl Esters by High-Pressure Liquid Chromatography	359
RAFAEL RANGEL-ALDAO, DAVID SCHWARTZ, AND CHARLES S. RUBIN. Rapid Assay for Cyclic AMP and Cyclic GMP Phosphodiesterases	367
HSIN-HSIUNG TAI AND WILLIAM Y. CHEY. Rapid Extraction of Secretin From Plasma by XAD-2 Resin and its Application in the Radioimmunoassay of Secretin	376
P. T. MATSUDAIRA AND D. R. BURGESS. SDS Microslab Linear Gradient Polyacrylamide Gel Electrophoresis	386
FRED POLSKY, MARSHALL HALL EDGELL, J. G. SEIDMAN, AND PHILIP LEDER. High Capacity Gel Preparative Electrophoresis for Purification of Fragments of Genomic DNA	397
BARBARA A. BRENNESSEL, D. PAUL BUHRER, AND A. ARTHUR GOTTLIEB. Use of Insoluble Heparin for Isolation of DNA Polymerase Enzymes from Murine Myeloma	411
J. ALEX NICHOLSON AND T. J. PETERS. Fluorometric Assay for Intestinal Peptidases	418
JOSTEIN HOLTLUND AND TOM KRISTENSEN. A Method for Density Gradient Isoelectric Focusing in Small Scale	425
G. J. WEI AND W. C. DEAL, JR. A Simple "Width" Method for Easy Determination of Diffusion Coefficients with Maximum Utilization of Data	433
STANLEY SAMUELS AND IRVING FISH. Procedure for Measurement of Amino Acid Transport from Blood to Brain in Small Animals	447
DORON DAGANI AND MICHAEL G. ARCHER. Colorimetric Determination of Acetaldehyde in the Presence of Formaldehyde	455
RONALD HAYMAN, ROLAND MCGREADY, AND MARTIN B. VAN DER WEYDEN. A Rapid Radiometric Assay for Dihydrofolate Reductase	460
D. A. BALTUSKONIS, Y.-N. TANG, AND R. J. NEWTON. Use of Radio-Gas Chromatography in the Study of Plant Metabolism	466
DANIEL INNERS, STEPHEN H. TINDALL, AND KIRK C. AUNE. Automatic Collection and Processing of Data from the Ultracentrifuge Using a Programmable Desk Calculator	477
GERALD J. MANIUS, PATRICIA FALLON, AND RONALD TSCHERNE. Identification and Determination of Thyroxine Using Gas-Liquid Chromatography	496
GUY D. GRIFFIN, HELEN G. SELLIN, AND G. DAVID NOVELLI. Optimization of Phenol Extraction Procedures for Preparation of RNA from Mammalian Lymphoid Organs	506
RICHARD F. BLANCHARD, SUSAN D. BLAS, AND PAUL J. DAVIS. Effect of NaI on Protein Determination by the Lowry Method and by Absorption Spectroscopy	521
KAMALEES SOM AND DEBI P. NAYAK. Isolation of the Proviral Coding Strand of Avian Myeloblastosis Virus from Leukemic Chicken Myeloblast by Affinity Chromatography	527

CLIFFORD S. SATO AND FERENC GYORKEY. Purification of Protease-Extracted Glycosaminoglycans by Short-Distance Paper Chromatography with a Zinc Acetate Solvent	540
JON BELISLE AND D. F. HAGEN. Method for the Determination of the Total Fluorine Content of Whole Blood, Serum/Plasma, and Other Biological Samples	545
J. M. CONROY AND C. Y. LAI. A Rapid and Sensitive Fluorescence Assay for Angiotensin-Converting Enzyme	556
DIANE DOTTAVIO-MARTIN AND JOANNE M. RAVEL. Radiolabeling of Proteins by Reductive Alkylation with [¹⁴ C]Formaldehyde and Sodium Cyanoborohydride	562
D. B. GLASS, R. A. MASARACCHIA, J. R. FERAMISCO, AND B. E. KEMP. Isolation of Phosphorylated Peptides and Proteins on Ion Exchange Papers	566
NGA Y. NGUYEN AND ANDREAS CHRAMBACH. A Test of the Resolving Power of Cascade Electrofocusing and Cascade Stacking: Separation of BSA from Ovalbumin	576
A. G. ZACCHEI AND L. L. WEIDNER. An Electron-Capture Gas Chromatographic Method for the Determination of Piperidine Content in Brain Tissue	586
MAKOTO TAKAHASHI, ROBERT F. RAICHT, AMAR N. SARWAL, ERWIN H. MOSBACH, AND BERTRAM I. COHEN. An Improved Method for the Identification and Quantitation of Secondary Bile Acids in Biological Samples	594
W. THOMAS SHIER AND JOSEPH T. TROTTER. Phospholipase A2 Electrophoretic Variants and Their Detection after Polyacrylamide Gel Electrophoresis	604
PHILLIP SHEELER, MARK H. DOOLITTLE, AND HARRY R. WHITE. Method and Apparatus for Producing and Collecting a Multiplicity of Density Gradients	612
CHARLES CINTRON, BENIGNO D. PECZON, AND CLAIRE L. KUBLIN. A Method for the Quantitative Analysis of Hydroxylysine and Its Glycosidic Derivatives Using High-Voltage Paper Electrophoresis and Fluorescamine	622

SHORT COMMUNICATIONS

CHARLES H. BLOMQUIST, CLAIRE E. KOTTS, AND ERICK Y. HAKANSON. A Simple Method for Detecting Steroid Aggregation and Estimating Solubility in Aqueous Solutions	631
ROBERT K. GOITEIN AND STANLEY M. PARSONS. Rapid Separation of 5-Phospho- α -D-ribose-1-diphosphate from its Metabolic Derivatives	636
PETER FELKER AND GILES WAINES. Colorimetric Screening Assay for Cystine plus Cysteine in Legume Seed Meals	641
DUNCAN MCREE. Inexpensive Apparatus for Preparation of Multiple Discontinuous Gradient	648
AUTHOR INDEX FOR VOLUME 87	653
The Subject Index for Volume 87 will appear in the December 1978 issue as part of a cumulative index for the year 1978.	

INFORMATION FOR AUTHORS

Analytical Biochemistry will publish articles of broad interest on qualitative and quantitative techniques based on chemical, physical, and biological principles; methods of preparation, purification, characterization, isolation, and separation of biological substances and related materials; and instrumentation.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be published nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission of the paper; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Analytical Biochemistry* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Address. Manuscripts should be submitted to **Analytical Biochemistry, Editorial Office, 111 Fifth Avenue, New York, N. Y. 10003.**

Manuscripts should be concise and consistent in style, spelling, and use of abbreviations. At least three copies should be submitted, each copy to include all figures and tables. The original copy must be typewritten, double-spaced, on one side of white bond paper, about $8\frac{1}{2} \times 11$ inches in size, with one-inch margins on all sides. Each manuscript should have a separate title page noting title of article, authors' names (without degrees), a running title (not exceeding 35 letters and spaces), an abstract (50–150 words), and address to which proof should be mailed. Please number all pages of manuscript.

Authors are encouraged to use descriptive subheadings in this order: Abstract, Introductory statement (no heading), Methods, Results, Discussion, Acknowledgments, and References.

Units of weights, measures, etc., when used in conjunction with numerals should be abbreviated and unpunctuated (e.g., 10%, 50 ml, 3 g, 8 cm).

Names of chemical or organic substances should follow the recommendations of the IUPAC–IUB Combined Commission on Biochemical Nomenclature (CBN) as published in the *Archives of Biochemistry and Biophysics* Information for Authors, appearing in the January issues of that journal.

In the Methods section, authors should draw attention to any particular chemical or biological hazards that may be involved in carrying out the experiments described. Any relevant safety precautions should be described; if an accepted code of practice has been followed, a reference to the relevant standards should be given.

Figures should be numbered consecutively with Arabic numerals in order of mention in the text; each figure should have a descriptive legend. Legends should be typed together on a separate sheet, double-spaced. All illustrations should be in finished form ready for the engraver. A convenient size for drawings is $8\frac{1}{2} \times 11$ inches (21×27.5 cm). Drawings should be made with India ink on tracing linen, smooth surface white paper, or Bristol board. Graph paper if used should be ruled in blue. Grid lines that are to show in the final engraving should be inked in black.

Photographs must be kept to a minimum and should be glossy prints with strong contrasts; the magnification should be indicated by a scale where possible.

Tables should be typed on separate pages, numbered consecutively with Arabic numerals in order of mention in the text. All tables should have descriptive headings, typed (double-spaced) above the table.

Footnotes should be designated in text by superscript numbers and listed on a separate sheet; in tables, by superscript letters and placed at bottom of page containing table.

References to the literature should be cited in the text by Arabic numerals in parentheses and listed at the end of the paper in consecutive order. Abbreviations of journal titles should

follow the style used in Chemical Abstracts' *Service Source Index* (1969 Edition). Please note style of capitalization and punctuation for journal articles and edited books in the following examples:

1. Chattoraj, D. K., and Bull, H. B. (1971) *Arch. Biochem. Biophys.* **142**, 363-370.
2. Gottschalk, A. (1960) in *The Enzymes* (Boyer, R. D., Lardy, H. A., and Myrback, K., eds.), 2nd ed., Vol. 2, pp. 461-467, Academic Press, New York.
3. Meister, A. (1957) *The Biochemistry of Amino Acids*, p. 298, Academic Press, New York.

Proofs. Galley proofs will be sent to the authors with reprint order forms. Fifty reprints of each article are provided free of charge.
